

ARE YOUR COMPOUNDING NEEDS BEING MET BY A REPUTABLE PHARMACY?

Important questions to ask your Compounding Pharmacy:

What states are you licensed in? Why is this important?

1. It is State law that the pharmacy be licensed in the state in which medications are shipped to. This protects you and your patients by ensuring that the pharmacy is aware of that particular state's laws and regulations.
 2. A Pharmacy should be able to provide you with either a copy of their state pharmacy license for each state or their license number in order for you to verify with the individual State Boards of Pharmacy.
 3. **Wellness Pharmacy® can ship to 49 states (see reverse side for list)**
-

How experienced is your pharmacy in compounding?

1. Wellness Pharmacy® has been compounding for over 44 years and is considered a compounding specialist.
 2. Wellness only employs highly qualified, registered Pharmacists, Doctors of Pharmacy and Pharmacy Wellness Technicians.
 3. Pharmacy® has a three-point Pharmacist check system, in place at various stages, to ensure accuracy of the order and the preparation to be dispensed.
 4. All employees are extensively trained in compounding preparations and have semi-annual evaluations to ensure proper technique.
 5. We currently have 14 Pharmacists and Doctors of Pharmacy on staff to answer all of your compounding
 6. questions and meet your needs.
 7. Only custom, non-commercially available preparations are made for patients, pursuant to a practitioner's
 8. prescription.
-

How can you assure me that the products ordered for my patients are potent and sterile?

1. Wellness Pharmacy® has two state-of-the art laboratories. One laboratory is dedicated only to preparing sterile preparations and the other for compounding all non-sterile preparations (i.e.-capsules, gels, suppositories, suspensions, etc).
2. Our Sterile Laboratory is an ISO 7 (class 10,000) clean room with ISO 5 (class 100) hoods.
3. Wellness has an independent certification company certify the hoods and rooms semi-annually as required by both State and Federal regulations.
4. Our non-sterile laboratory has state of the art equipment, including powder containment hoods to prevent cross-contamination. All equipment is calibrated daily.
5. Only the highest quality powders, that meet Federal regulations USP 797 and USP 795, are used in our preparations. We only buy from reputable suppliers that are FDA approved for our powders.
6. We can provide you with a Certificate of Analysis and MSDS sheet on all of our powders.
7. All compounding staff involved in compounding is evaluated periodically throughout the year to maintain their aseptic techniques.
8. All injectable products go through extensive end product testing, utilizing an independent, FDA approved testing laboratory.
9. Wellness Pharmacy® tests the sterile products for sterility, endotoxins, particulate matter and potency. Our Injectable sterile preparations are quarantined until test results are received before dispensing to your patients.
